PROFESSIONAL SUMMARY
Senior Full Stack Software Engineer with 6+ years of experience architecting resilient distributed systems and web applications using TypeScript, React, and Node.js. Track record of scaling microservices to 500k+ MAU while leading agile engineering squads.

WORK EXPERIENCE
Senior Full Stack Engineer | Tech Finansial Nusantara (2021 - Present)
- Spearheaded the architectural migration of monolithic backend to event-driven microservices using TypeScript, Node.js, and Docker, boosting transaction throughput by 65%.
- Architected and built core React web portal with PostgreSQL database, serving 450,000 monthly active users with 99.98% uptime.
- Optimized database indexing and Redis caching layer, slashing query latency by 42% across 12 million daily requests.
- Streamlined automated CI/CD deployment pipelines on AWS with GitHub Actions, reducing release deployment cycle by 4 hours.
- Mentored 5 mid-level software engineers through regular pair programming and systematic code reviews.

Software Engineer | Solusi Digital Sejahtera (2018 - 2021)
- Developed and maintained responsive frontend web applications using React, Next.js, and Tailwind CSS.
- Engineered 15+ secure RESTful API endpoints in Node.js and Express connected to PostgreSQL.
- Implemented comprehensive unit testing coverage using Jest, increasing code coverage from 55% to 88%.
